

## MESSAGE FROM JEY, 3-13-2005

JEY is here, and JEY is aware of the conversation that you have had during this time of meeting and does commend you on the ability that you have to understand those things about which JEY has spoken.

There is indeed a time in the life of all mankind that they should come to an understanding about which we have talked; but know that there are few who do so. And so it is to the encouragement of each of you that we who come to you in Spirit do ask that you be able to further understand those things about which we have been talking.

JEY is aware of the needs of those about whom you have spoken and the names that you have placed in the center for prayers. Know that JEY can tell you that each one will be given the guidance and protection and help that they need, for indeed they are in a time of much need and will indeed be aware that they are being helped.

It is at this time that JEY wishes to discuss something of importance to each of you. You are very fortunate to have in your midst one who does indeed teach that which is Truth with regard to Spiritual things upon this Earth. Indeed the one who is in your group has a good outlook upon those things of a Spiritual value; and so it is that we would come to tell that person that he will be guided in what he has to say and what he does with regard to a deeper understanding of things Spiritual in this life. For those of you who are attempting to understand more fully those things of Spiritual value in this lifetime, allow JEY to say this. You have increased your own desire to learn more at this time of meeting, and will have the ability to understand more as the days pass. Simply pray for guidance and protection in order that we may know that you are listening to us or attempting to hear us, and we will indeed be in your midst.

JEY wishes once again to thank the one who makes it possible for you to meet in this home. Know that the blessings of the Creator will be with this home and this person. Those of you who are in attendance here will feel the blessing of the Creator of Us All. And so at this time JEY wishes to touch upon another subject.

You have understood that which has been the subject that JEY has talked about, that of perception and knowledge. That you have understood. With that in mind, allow JEY to talk about something new for you that will have some connection to what we have discussed. At this time upon the Earth there is much occurring that does have each of you somewhat perturbed with regard to your own being upon Earth. You are well aware of the violence upon the Earth; you are aware of that which is war upon the Earth; you are well aware, too, of the need for more guidance among children at this time. And so JEY would attempt to discuss those things for you.

With regard to violence, JEY has this to share with you. First, be aware that upon the Earth much violence is taking place at this time between people, between governments of people, and know that those things will continue to take place. Much is being done to curb the violence upon the Earth, but as you can see, little is having an effect upon the Earth. And so JEY would advise this. When you see an act of violence taking place that happens upon the Earth, know that you---in order to benefit your own well being---need to withdraw self from such. In other words, it is not to your advantage to view such things. You will not, in fact, benefit your Spirit by forcing self to view these things of violence that are taking place. And so JEY would ask you to withdraw from them. Know that as you do so, you are not accepting the acts of violence by allowing your Spirit to be in contact with them. In other words, your Spirit is here to learn, but it does not need to be given the pictures of violence that you see. So, with this in mind, simply take yourself away from those pictures that you see or the news that you hear that has anything to do with violence.

And so with that in mind, JEY would then talk about that which is war upon the Earth. Know that the war that your country is involved in is not the only war upon the Earth. In other words, throughout the Earth, you will find that people are fighting people, groups are fighting groups. Know that this is not good for the welfare of mankind. It is destroying often times their means of livelihood. So there are people in need all over the Earth because there is fighting and war all over the Earth.

Mankind has lost the ability to get along in areas where there are other groups of people. And so with this in mind, you will find that there are many people who are attempting to simply quiet the thoughts of other people by killing them through some action of violence, war, or fighting within groups. Your own country is involved in a war which does bring about the killing of people within the country. Those people who are known to you to be fighting the people within their own country or people coming into that

country are taking many lives that is not necessary to be taken at this time.

And so the people that you know as the outsiders that are coming in to do away with people in this country are indeed hurting themselves in the long run. Know that your country does indeed have a worthy reason for being there, and that was to be rid of a dictator, but know that those people should be allowed to fight their own battles in that regard. Know that you have much to learn upon the Earth yet before you are worthy of having peace upon the Earth. We who are in the Spirit Realm do come to wish for you peace upon Earth, and for all people we wish peace upon Earth. But that is not to be in the few short years ahead. You will find that there will be continued violence.

And know, too, that upon the Earth the violence in the Earth is now coming to the surface; and you will find that there are many places upon the Earth that are being destroyed by these things of violence that are coming from within the Earth. This is not something that will bring peace to the people, for they do not feel at peace when they know their lives are threatened by those things within the Earth which are out of their control.

You will find, too, there are many things upon the Earth with regard to things of nature that are destroying certain areas within the Earth. You will find that climates are changing upon the face of the Earth, and so this will have an effect upon people. So you must be concerned about people and their reactions to all these things, and be in prayer to the Creator of Us All in order that those things may be righted...the violence, the wars, the things within the Earth ...know that they can be righted. Those of you who are OMEGA have an opportunity now to serve the people of the world by being in prayer for them in order that each of these things may be righted. We do not ask you to be that which is a changer of fate upon the Earth, but rather a changer of events that are taking place. We ask you to be in prayer for those events that they may change for the good of the people who lives upon the Earth.

And so with this in mind, JEY wishes to talk with you about the things that you can do as OMEGA upon the Earth.

As you know, the members of this group of OMEGA are scattered throughout the land and do indeed remember the times when they were here and were able to understand what OMEGA was about. They still follow the group and their events upon the Earth. Many of them still receive the messages that JEY gives and that others give upon the Earth. We would ask you to become as wide spread as possible with reaching those people who have a hunger for the Spiritual message that JEY gives. We would ask you to simply share with not only the members of OMEGA but others who are in your acquaintance who you feel will be receptive to these messages. In other words, we are asking you go on a mission, and that mission is to spread the truth and the knowledge that you know. We have not come to you to discuss knowledge versus perception for no reason at all, but rather to get you to see the difference between them and to be able to share Truth and knowledge as you will meet others upon the Earth. You will have the opportunity to do that.

And so JEY would come to say this. There will be placed in your presence in the days to come many people who will be open to words of truth and knowledge that you can give to them. Allow it to be so that you will not be fearful of speaking out to those people who come to you. It is to be a time of joy that you can do so; not one of fear. So JEY would at this time simply ask you to have the strength, the courage and the will power to speak out to people as they come into your presence. We will speak to you in the days to come; and remember that JEY will come to you at any time where one of you has a need and will call upon the name of JEY. This one will be willing to try to communicate with you in some way.

This one will ask you to go in peace, to be at peace with what is occurring, and to be at peace with self, for you are chosen people who are here for a purpose upon the Earth. Do not let that purpose escape you. Go now in love, and be at peace. AMEN.
